**Preoperative General Instructions**

Dear Pet Owner,

As you know, your pet is scheduled for an upcoming procedure which will require anesthesia. We are looking forward to providing your pet with the best possible care.

- Dog owners please exercise your pet before bringing it to the hospital. Making sure it urinates and moves its bowels.
- We will perform a complete physical examination to look for any existing medical conditions that might complicate the procedure or compromise your pet's health.
- We recommend pre-anesthetic testing that provides insight as to what is occurring internally. This testing could uncover health concerns, which cannot be detected from the medical exam alone.
- Please look over the enclosed paperwork. If you have any questions, please call the office.
- Please sign the enclosed pre-anesthetic consent form to authorize or decline the recommended tests.
- Please bring the consent form with you when you drop off your pet.
- Please feel free to call us with any questions or concerns that you may have regarding these tests or the procedure.

Date of Surgery: \_\_\_\_\_ Admitting Time: \_\_\_\_\_

Procedure: \_\_\_\_\_

**Important: No food after midnight, No water after 6 AM the morning of the surgery!!**
